

eAppSys is pleased to share that Balfour Beatty have continued using the DMOne™ cloud platform for their legacy Oracle eBusiness Suite systems consolidation into a single Oracle instance.

Connect Plus Services, who maintain and operate the M25 motorway network including all adjoining trunk and slip road, are now successfully live and using the solution.

The latest migration was complex in part due to contracts data and its joint-venture characteristics, but with help of the DMOne™ platform and our committed team, we were able to achieve an excellent outcome!

"Thanks eAppSys Team, AWESOME!! you have done an amazing job, in such a tight window of time. I know this has not been without challenges, late nights with little rest so this is really appreciated...."

- George Pantelli, Balfour Beatty CPS Team
